

Returning Student Room Assignments

Returning students wishing to live on campus must submit a housing contract before any room assignment can be made.

There are designated times/days in the spring semester for returning students to reserve on-campus housing for the following academic year. The Office of Residential Life will not guarantee a student's request for a double room as a single and the student may be assigned a roommate.

Exclusion from housing may be made if a student has demonstrated a lack of respect and responsibility for the policies of Illinois College and the residential life program. The College reserves the right to make whatever accommodation reassignments or adjustments that are deemed necessary by the director of residential life.
